

2-3-2003

I am writing, as a Puget Sound resident and concerned citizen, about the worrisome condition of Orca pods in our area.

I request the orcas of Puget Sound be declared a depleted species.

To make their environment more healthy there has to be stronger and enforceable restrictions on toxic substances entering the waters of Puget Sound & the Strait of Juan de Fuca.

The navy must be prevented from dumping depleted uranium off the Washington coast. DU is affecting all marine life both plant & animal in detrimental ways.

Please take a determined and strong stand to insist Canada cooperate in Luna being returned to his pod in the San Juans.

Sincerely,

Marion J. King
